Subject: Overtopping Pit - Cleanup Response Needed

Hi Lee -

Warden Kuhn and Paul Fredrich with Kewaunee LCD were out to the heifer farm on the corner of Apple Road and CTH S. Manure laden water from the storage is now making it to the road ditch. This needs to be cleaned up immediately and the storage needs to be emptied. The concern is that this is going to get worse as rain is forecasted for Friday and Saturday. Warden Kuhn will be back to the site in the morning tomorrow (Friday) to check on the progress.

I also spoke with Nathen Nysse and came up with a clean-up plan. It sounds like the farm is going to scoop the solids out of the storage and put them in the pit at the Main Dairy. Liquid material is going to be pumped and land applied on the field across the road from the site. Note that the road ditch will likely need to be flushed with clean water as well to ensure all material is captured which may involve the installation of dams to capture the material.

Please contact me tomorrow (Friday) to provide an update on the clean-up efforts and discuss the situation at this facility. I will be out of the office for a period of time from approximately 10-2 but should be in the office the rest of the day. You can also contact Warden Kuhn if needed as he will be visiting the site tomorrow.

Thanks,

Amy S. Callis
